

High Shear Rotor Stator Mixers

Batch and Inline High Shear Rotor-Stator Mixers are available from stock in a wide range of sizes and with many optional features.

Standard features include:

- Stainless steel wetted surfaces
- A variety of rotor and stator designs
- Laboratory or production sizes
- Shaft support bushing options
- Hydraulic lift systems

Special Models

We also have in stock approx. (15) Special Ultra High Shear Models with several special rotor- stator configurations; these are used for solids introduction into a liquid stream, and for applications that require sub micron particle sizes.

Call for details on Standard and Sanitary designs to determine our exact inventory.
