

Double Planetary Mixers

Double Planetary Mixers are ideal for the mixing and dispersion of materials up to six million centipoise. They are often used in combination with Follower Plate Discharge Systems and multiple mix cans to enable nearly continuous operation. Production models are available up to 750 gallons working capacity.

Standard features include:

- Stainless steel wetted surfaces
- Variable speed drives
- Thermocouples for temperature readout
- Vacuum capable
- Jackets for heating and cooling
